All frequency bands are optional and can be customized as required.
### Total Power
- Up to 12watt

### Power Supply
- AC 110-240V / DC 5V 12A

### Shielding Radius
- Up to 50 meters
- Signal strength <= -75dbm, still depends on the signal strength in the given area

### Device Weight
- 1.8 KG

### Package Weight
- 2.8Kg

### Device Size
- 200 (L) *165 (W) *60 (H) mm

### Package Size
- 460(L)*245(W)*90(H)mm

### Advantages and Features
1. Adjustable output power. Each band can be controlled separately and simultaneously.
2. Design with smart cooling system via heat sink. 365days/24Hours/7days continuous nonstop operation.

### Complete Accessories
- Omni antennae 5pcs, Power adaptor(5V/12A)

### Applications

1. **Before turning on the power, always connect the antennas to the corresponding channels by the colors marked on the machine.**

### North America Type Standard

Euro Type Standard

Yellow  GSM  925-960MHZ  
Red    GPS   1570-1580Mhz  
Blue   DCS   1805-1880Mhz  
Green  3G    2110-2170Mhz  
White  WIFI  2400-2500Mhz  

2. Connect the power adapter to the jammer, switch ON the jammer and Power LED will be on.
3. Adjusting the output power of each band using the knobs on the device. Each band can be controlled separately and simultaneously. Min: Power OFF Max: Maximum Power

Notes

1) The range of the device will be determined by the local area signal strength. In different situations, it will have different performance.

2) Please try to position the device in a higher position while it is working, for better coverage performance. The suggested height is approximately 2M. To avoid the loss of function of the device, please avoid placing the device on / in metal materials.

3) Do not put the device near computers, notebook computers, televisions, stereos, radios, cordless phone base stations, etc., to avoid interference and performance issues.

4) Place the jammer away from metal materials to make sure the working condition will not be affected.
