Before turning on the device you must install the antennas according to the indicated positions on the handset:

1. CDMA/GSM: 850 to 960MHz
2. DCS: 1805 to 1880MHz or DCS/PCS: 1805 to 1990MHz
3. 3G: 2,110 to 2,170MHz
4. 4G LTE: 725-770MHz or 790-862 MHz
5. 4G2 2345-2400MHz or 2620-2690 MHz

- CDMA/GSM/DCS/PCS,3G,4GLTE/WIMAX, You can select 6 of above frequency bands you need in a jammer.
- Total output power is 2.5W. Each band can adjust to ON or OFF power.
- Jamming range: up to 20m.
- Jamming radius depends on the strength signal in local area.
- External Omni-directional antennas for TX frequency covered down link only.
- Power supply: 50 to 60Hz, 100 to 240V AC
- With AC adapter (AC100-240V-DC12V), 4000mA/H battery
- Dimension: 126x76x35mm and not include antennas
- Weight: 0.65kg

- Advantages:
  - Multiple bands, Can adjust ON or OFF any single band without influencing the other bands operation.
  - High output power
  - Cooling fan inside, Can be used in car with car charger and AC charger
  - Built-in Battery: 4000mA/h. Full charge time about 4 Hours.
  - Operational time on a full charge: 1-2 Hours.

- Application Area:
  - For some locations of special purpose such as hospitals, gas stations, etc. Please field test first to make sure no interference occurs to the normal operation of equipment and instruments

- Warranty: One year from delivery date.

- Where noted - frequencies are given as an example, as custom tuning and geolocation may determine different frequency programming.
